

Go-to-Market Airdrop Campaigns

One product. One specialization. Predictable results.

[01]

No ROI

\$50-100K+ spent on marketing
with no clear return

[02]

Bots, Not Users

Airdrop attracted bots.
Zero real product traction.

[03]

Fragmented Team

5-7 freelancers with no sync.
SMM says one thing, KOL another.

[04]

Dead Community

Community dies 2 weeks after
campaign. No retention.

Airdrop is not marketing. It's a product launch.

FOR COMPARISON

In-house team

~~**\$15-25K**~~

/month

SMM + CM + KOL Manager + Designer + PM. Salaries only. No strategy. No guarantees.

Founders work personally

We don't hand off to juniors. You work directly with the people who ran Nomisma and Trading Aggregator.

Weekly reports

Full transparency on every metric. No surprises. You see exactly what's happening.

Pay per stage

Preparation is separate. Management is monthly. Don't like it — stop anytime.

Your result = our case

A bad result hurts us just as much. Our case studies are our main asset.

Let's see if this is right for you.

30 minutes. We'll analyze your project and tell you honestly —
whether an airdrop campaign makes sense and what results to expect.
